PRODUCT BRIEF / CLIENT SOLUTIONS

CORView

Centralized optical and RF access network management

CATEGORY	Web Application, Java
FOCUS	Network Management
AT A GLANCE	Discover, monitor and organize CHP networks from one operational view.

Overview

CORView Enterprise is a client-server management solution for optical and RF network access systems in HFC environments. It provides centralized visibility into chassis, modules, inventory and operational faults.

Key capabilities

- CHP chassis and module discovery by IP or address range
- Graphical chassis view and searchable inventory
- Inventory exports in HTML, CSV, PDF and text
- Role-based access for administrators and operators
- Alarms, traps and notification workflows

Technologies & platforms

Java / MySQL / HFC / CHP / Role-based access

Practical benefit

Support network administrators with structured inventory, discovery and role-based management.
