PRODUCT BRIEF / CLIENT SOLUTIONS

Opti-Trace Web

Web-based shelf and chassis management

CATEGORY	Web Application, Visual C++, Nucleus WebServer, AJAX, Image Processor
FOCUS	Device Monitoring
AT A GLANCE	Monitor telecommunications hardware across daisy-chained shelves.

Overview

Opti-Trace Web is a web-based shelf monitoring application for headend environments, supporting visibility into network chassis, modules and operational status through a browser interface.

Key capabilities

- Remote shelf and chassis status monitoring
- Support for daisy-chained chassis arrangements
- Monitoring of RF and optical cards within chassis
- Alarm history, clearing and SNMP traps
- Batch configuration and standards-aligned monitoring

Technologies & platforms

Visual C++ / Nucleus WebServer / AJAX / SNMP / SCTE HMS

Practical benefit

Bring alarm and chassis monitoring into a lightweight web-based workflow.
