PRODUCT BRIEF / CLIENT SOLUTIONS

RFoG Web Application

RF over Glass network monitoring and provisioning

CATEGORY	Web Application, C#.NET
FOCUS	Network Management
AT A GLANCE	Monitor optical nodes and Ethernet connections with an accessible topology view.

Overview

The RFoG Web Application is a network management solution for optical nodes and Ethernet provisioning, communicating with devices over IP-based networks and supporting USB and SNMP-based interfaces.

Key capabilities

- Tree-structured visibility of optical nodes and connections
- Topology discovery and network structure views
- SNMP device support and USB connectivity
- Batch configuration for multiple network elements
- Monitoring across Windows, web and Android environments

Technologies & platforms

RFoG / SNMP / USB / C# / WPF / IP networks

Practical benefit

A focused network view for optical deployments and operational workflows.
