PRODUCT BRIEF / EMBED PRODUCTS

OneApp

Unified network management across HFC, PON and RFoG

CATEGORY	Web Application, Vue JS & Python
FOCUS	Network Management
AT A GLANCE	Bring craft, element and shelf management together in one platform.

Overview

OneApp is a network management web application that combines the capabilities of craft, element and shelf management systems for local and remote operations, supporting networks of different sizes.

Key capabilities

- Lite and Enterprise versions for varied deployments
- Topology auto-discovery and multi-network configuration
- Alarm history, trap records and receiver setup
- Firmware and FPGA updates with chassis-level management
- Data export in CSV, PDF, HTML and text formats

Technologies & platforms

Vue.js / Python / Flask / MySQL / MQTT / SCTE HMS

Practical benefit

One operational platform for discovery, monitoring, configuration and network-wide reporting.
